Heat Circulating Blower

When you want to extract the maximum amount of heat, an optional heat circulating variable speed blower offers increased heating efficiency. An optional sensor control automatically turns the blower on and off. (With 1101 and 1401 inserts models, WHISPER QUIET™ HEAT circulating blowers with automatic thermidisc and variable speed control are standard with the units)

Napoleon's porcelain enamel cast iron surround kits are available for the 1101 and 1401 inserts. Create a distinct elegance with any of the 3 colours or painted black.

Ash Dump Pan Option

Optional for the leg models, 1100PL and 1400PI allows you to dispose of ashes quickly and easily.

Standard on pedestal models

Trivet

Available for pedestal models only.

Satin Chrome Trivet

24 Karat Gold Plated Trivet

Painted Black standard with pedestal models

Secondary Air Tube - Kiln Construction

Napoleon's secondary air tube is insulated with ceramic fiber and protected with a stainless steel cover plate, ensuring complete combustion. 100% efficient!

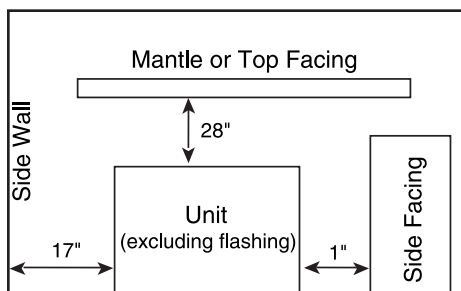

This fully lined refractory firebox acts as a kiln, concentrating the maximum amount of heat to efficiently heat your home.

Dual Vortex™ Action

To achieve an extraordinary clean burn without a catalytic combustor, horizontal jets of super heated secondary air are mixed with the fire's smoke to burn off released smoke particles. You can actually watch the spirals of secondary flames just below the ceiling during most of the burn.

Installation Clearances

A combustible floor must be protected by a non-combustible material extending 18" to the front of the unit and 8" to the side.

Measuring For An Insert
